

WATERSAVER PROGRAM

WaterSaver is an organic, slow-release fertilizer made out of dried chicken manure.

It's non-burning and you can even apply it without watering it into the soil.

WaterSaver contains a wetting agent, allowing water to penetrate tough clay soils.

Plus, WaterSaver contains mycorrhizae; micro-organisms that attach to the root systems of plants and allow them to absorb more water and nutrients. All this combines to create a stronger, healthier, more drought tolerant lawn. Covers 2,500 sq. ft.

#1

MARCH-APRIL

COLORADO'S CHOICE SPRINGGREEN + IRON

Gets your lawn off to a fast, healthy start.
Adds Iron for a deep green color.

#2

MAY-AUGUST

WATERSAVER LAWN FOOD 2 BAGS
